More informations about Polystyrene Microplates

Ultra clear polystyrene microplates

96-well microplates made from crystal clear polystyrene (PS). The plates are available in a choice of three different well bottoms: flat (suitable for optical reading eg. non-UV spectrophotometers, and ELISA applications when pre-treated plates are not required), plus round and v-shaped (suitable when total sample recovery is required).

Choose from aseptically produced plates in convenient mini-packs or individually-wrapped, sterile (irradiated) plates. Lids available separately.
